

GEN24 + UP.storage =
GEN24 Plus

GEN24 + UP.storage = GEN24 Plus

With the Fronius UP.storage software upgrade, any Fronius GEN24 can become the hybrid inverter Fronius GEN24 Plus. If PV system owners wish to integrate a battery storage into their PV system at a later date, you can easily purchase and install Fronius UP.storage for them. This activates the battery connectivity as well as the Full Backup power option.

Advantages

Cost Control

The Fronius GEN24 saves costs when purchasing a PV system and can be upgraded to the Fronius GEN24 Plus when required.

Flexible and Independent

Yes, no, maybe? Thanks to Fronius UP.storage, customers can add battery storage to their PV system at a later date.

Quick and Easy

After purchasing the license, installing Fronius UP.storage only takes a few quick steps.

Upselling Potential

With Fronius GEN24 and Fronius UP.storage, you offer your customers a variety of options for easy system expansion. Use the Solarweb battery simulation tool to demonstrate additional savings potential.

Efficient Inventory Utilisation

One device – two possibilities: If needed, you can upgrade the Fronius GEN24 to a hybrid inverter.

Upgrade Instead of Replacement

With Fronius UP.storage, there is no need to replace the inverter when a battery storage is retrospectively desired.

GEN24

UP.storage

GEN24 Plus

* Fronius recommends installers perform the upgrade 24 hours prior to the installation of the battery at the customer's location.
